

Privacy Policy

Metrony — Metronome Application
Lumitrix Software

Last Updated: February 24, 2026

Effective Date: February 24, 2026

1. Introduction

Welcome to Metrony (“the App”), a metronome application developed and published by Lumitrix Software (“we”, “us”, “our”). We are committed to protecting your privacy and being transparent about how data is handled when you use our App.

This Privacy Policy explains what information is collected, how it is used, and what choices you have. By downloading, installing, or using Metrony, you acknowledge that you have read and understood this Privacy Policy.

2. Information We Collect

2.1 Information We Do NOT Collect

Metrony is designed with your privacy in mind. We want to be clear about what we do **not** collect:

- **No personal information:** We do not collect your name, email address, phone number, or any other personally identifiable information.
- **No account creation:** Metrony does not require or support user accounts or registration of any kind.
- **No location data:** We do not access or collect your geographic location.
- **No camera or microphone access:** The App does not request or use access to your device’s camera or microphone.
- **No contacts or address book:** We do not access your contacts or address book.
- **No analytics or tracking:** We do not use any first-party analytics, usage tracking, or telemetry services.
- **No crash reporting:** We do not use crash reporting tools that transmit data to external servers.

2.2 Data Stored Locally on Your Device

Metrony stores a small amount of data **locally on your device only** to preserve your preferences between sessions. This data is never transmitted to us or any external server. Locally stored data includes:

- **Metronome settings:** Your last-used BPM (beats per minute), number of beats per measure, and beat pattern configuration.
- **Language preference:** Your selected display language within the App.

This data is stored using Hive, a lightweight local database that operates entirely on your device. You can clear this data at any time by clearing the App’s data through your device’s system settings, or by uninstalling the App.

2.3 Information Collected by Third Parties

Metrony uses third-party services that may independently collect certain information. These services operate under their own privacy policies, which we encourage you to review:

Google AdMob (Advertising)

Metrony displays banner advertisements provided by Google AdMob. Google AdMob may collect and process certain data in accordance with Google’s privacy policy, including but not limited to:

- **Advertising ID:** A resettable, device-level identifier used for advertising purposes.
- **Device information:** Such as device model, operating system version, screen size, and language settings.
- **IP address:** Used for approximate geographic location to serve region-appropriate ads.
- **Ad interaction data:** Information about which ads are displayed and whether you interact with them.

We provide general contextual keywords (such as “music”, “metronome”, “rhythm”) to help deliver relevant advertisements. We do **not** provide any personal information to AdMob.

For more information about how Google handles your data in connection with advertising, please review:

- [Google Privacy Policy](#)
- [How Google Uses Information from Sites or Apps that Use Google Services](#)
- [Google Advertising Privacy & Terms](#)

Google Fonts

Metrony uses Google Fonts to display typographic content. Google Fonts may make network requests to Google servers to download font files. For more information, please review the [Google Fonts Privacy FAQ](#).

3. How We Use Information

Since we do not collect personal information, we have no user data to use, process, or share. The locally stored preferences described in Section 2.2 are used exclusively to:

- Restore your metronome settings when you reopen the App.
- Display the App in your preferred language.

4. Data Sharing and Disclosure

We do **not** sell, trade, rent, or otherwise share any user data with third parties, because we do not collect any user data.

The only third-party service integrated into the App is Google AdMob, which operates independently as described in Section 2.3.

5. Data Retention

- **Local data:** Metronome preferences and language settings remain on your device until you clear the App’s data or uninstall the App. We have no access to this data.
- **Third-party data:** Any data collected by Google AdMob is retained according to Google’s own data retention policies. Please refer to Google’s Privacy Policy for details.

6. Data Security

We take reasonable measures to ensure the security of locally stored data:

- All data is stored locally on your device using the Hive local database and is subject to the security protections provided by your device's operating system.
- No data is transmitted from the App to our servers, as we do not operate any data-collection servers.
- Communication between the App and third-party services (such as AdMob and Google Fonts) is conducted over encrypted HTTPS connections.

7. Children's Privacy

Metrony is a general-audience application suitable for users of all ages. We do not knowingly collect personal information from anyone, including children under the age of 13 (or the applicable age of digital consent in your jurisdiction).

Since the App displays advertisements via Google AdMob, ad content is governed by Google's policies. Google AdMob is configured to comply with applicable children's privacy regulations. If you are a parent or guardian and believe that your child has been exposed to inappropriate advertising content, please contact us at the email address provided below.

8. Compliance & International Users

Metrony is available worldwide and supports 19 languages. Regardless of your location, the data handling described in this Privacy Policy applies. No personal data is collected by us or transferred across borders by us.

8.1 GDPR (EU/EEA Users)

For users in the European Economic Area (EEA) and the United Kingdom, the lawful basis for processing any data through third-party services (such as Google AdMob) is legitimate interest (for contextual advertising) and consent (for personalized advertising, managed via your device settings). We do not act as a data controller for personal data. Google acts as an independent data controller for any data it collects through AdMob and is responsible for GDPR compliance.

8.2 CCPA (California Users)

For California residents, we confirm that Lumitrix Software does **not** sell personal information. All data practices are fully disclosed in this Privacy Policy.

9. Your Rights and Choices

Depending on your jurisdiction, you may have certain rights regarding your personal data. Since we do not collect personal data, many of these rights are not applicable. However, you have the following choices:

- **Clear local data:** You can delete all locally stored preferences by clearing the App's data in your device settings or by uninstalling the App.
- **Opt out of personalized ads:** You can adjust your device's advertising settings as described in Section 2.3.
- **Reset your Advertising ID:** You can reset your device's advertising identifier through your device settings at any time.

- **Uninstall:** You can stop all data processing associated with the App by uninstalling it from your device.

10. Changes to This Privacy Policy

We may update this Privacy Policy from time to time to reflect changes in our practices, technology, legal requirements, or other factors. When we make material changes, we will update the “Last Updated” date at the top of this document.

We encourage you to review this Privacy Policy periodically. Your continued use of the App after any changes constitutes your acceptance of the updated Privacy Policy.

11. Contact Us

If you have any questions, concerns, or requests regarding this Privacy Policy or our data practices, please contact us at:

Lumitrix Software

Email: lumitrixsoftware@proton.me

We will make every effort to respond to your inquiry within a reasonable timeframe.
